Experience

SEPTEMBER 2014 – MARCH 2016

RUNNER/SERVER, CINÈBISTRO

Provide the most satisfying and relaxing movie dining experience. Which included knowing how to operate new point of sale systems and ticket sale software. Shortly after being promoted to a server, I applied and was invited to join the corporate training team. That role included traveling and helping open new theater locations, and to train the new location's staff. During this role I briefly worked with the operations technicians and the Chief Technology Officer on the systems for the theater.

APRIL 2016 – MAY 2017

FIELD SURVEYER, HALDER SURVEYS

Work in a team to conduct surveys and provide field data to clients. Understanding of field technology and systems was critical to being able to gather the data needed for the CAD models of the area.

JULY 2017 – OCTOBER 2018

FURNITURE CARPENTER, CRAFTMAN'S PASSION

Apprentice as a furniture carpenter to make new and restore historical furniture. Working under a journeyman carpenter, I had to be self-motivated and a quick learner to provide the best quality product to each client. Client communication and product iteration were crucial in this position.

Education

MAY 2020

ASSOCIATE OF ARTS AND SCIENCE, SOUTHSIDE VIRGINIA COMMUNITY COLLEGE

EXPECTED GRADUATION IN 2023

BACHELOR OF COMPUTER SCIENCE, VIRGINIA COMMONWEALTH UNIVERSITY

Skills

- Team communication
- Coaching ability and teaching flexibility
- Basic understanding of Agile and UX design
- Learning agility and comprehension
- Analytical and problem-solving skills
- Computer and technology literacy and fluency

Activities

In my free time, I enjoy trying to analyze and understand software and try to study the processes used. Sometimes this includes simple malware to try and understand what types of information security risks there might be and how to spot and avoid them.
